

TESVOLT

THE ENERGY STORAGE EXPERTS

WHY CHOOSE A TESVOLT ENERGY STORAGE SYSTEM?

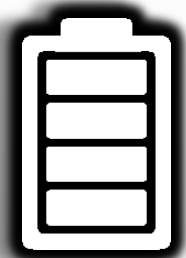

Industry leading 12 year manufacturer performance warranty

REAL local TESVOLT projects on the ground, here in WA, nationally & globally

The most efficient NMC cell utilisation on the market thanks to the unique, award winning, bi-directional cell balancing technology - 98% round trip efficiency!

100% Depth of Discharge with each individual module & cell ensuring the optimal performance and longest life of any lithium based system

Infinitely expandable at any time whilst optimising cell performance regardless of age

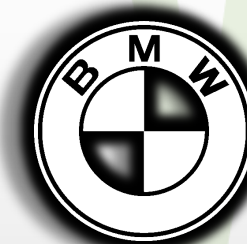

German designed & manufactured technology with large scale deployments internationally (MW scale) - global experience for Australian performance

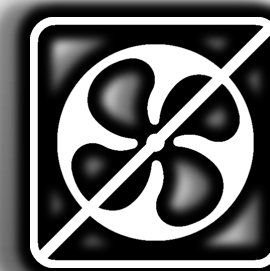

Complete, user friendly system monitoring providing peace of mind that your system is performing as expected, day-in day-out

Market leading prismatic lithium cell technology from an innovative global leader providing the highest energy density per cell whilst ensuring optimal safety

The same TESVOLT cell technology is used to power the BMW electric vehicles, selected for their safety, fast charge discharge and long life

Passive cooling integrated design - your system can operate in temperatures up to 50 deg. C with no integrated fan. No moving parts - no hassle for you

AWARD WINNING TECHNOLOGY
